

## Ordering You Fit Custom Shrouds

There are 2 variations of these units, so getting a serial number is really helpful. It is also useful knowing *what color the machine is and what color the shroud is?*

If the frame and shroud are different, then they have the older version and the shroud part number would end in **YG** or **YP**.

If the shroud and frame are the same, then they have the current production model and the shroud part number would end in a **GY** or **PY**.

### Explained:

On the first line (older version) for You Fit the frames were **Purple** and the shrouds were **Green**. When the frames were **Green**, the shrouds were **Purple**.

- The part numbers for the shrouds ended in either **YP** for **Purple** or **YG** for **Green**. For example, **12000-375YP** or **12000-375YG**

On January 17<sup>th</sup>, 2014, the You Fit product line changed to the current version, where the **Purple** frames had **Purple** shrouds and the **Green** frames had **Green** shrouds. The shrouds changed in design and the **Green** color changed slightly from the first variation.

- The part numbers for the shrouds also changed to **PY** for **Purple** or **GY** for **Green**. For example, **12000-375PY** or **12000-375GY**.

**YouFit Touch Up Paint:** **Green:** *First Style* 12 oz spray can: **KT160009**. Touch up 6 oz bottle: **KT060009**

**Green:** *Latest Style* 12 oz spray can: **KT160021**
