
Technical Information for our Service Providers and Dealers

Cybox Service Corp. Service Training Schedule 2012

New for 2012 Cybex 770A/AT and 625A/AT Arc Trainers are in production and will soon be shipping to facilities nationwide.

Now is the time to start thinking of Cybex service seminars to be trained on setup, diagnostics and repair of these all-new models. In addition to our standard training course, for 2012 we are introducing our new Advanced Training Course for our authorized service providers who have previously attended a Cybex service seminar in the past 2 years.
