

List of Compatible iPods on the 770 Line

(1st Generation)

(2nd Generation)

iPod Touch

(3rd Generation)

(4th Generation)

(5th Generation)

iPod Nano

iPhone 3GS, 3G

iPhone 4

The 770 line will play audio and video from an Apple device. In order to get an iPhone 4 with the latest software revision to play video you must start the track twice in a row. If it still does not work, try power cycling the device.

Note: The iPhone 5 and 6 can be used with an *Apple certified Lightning to 30 pin Adapter*. The iPhone will charge and play music, but unable to play video. Playback is not guaranteed with non-OEM connectors.
