

*The console fan can not be disabled in the console settings, but can be manually disabled by disconnecting the internal fan cable.*

### Issues Associated with Fan Disconnection

- The “alternate method” described in the Knowledge Base article [Cybex 770, 790 Touchscreen Calibration](#) (press and hold the "Fan" key for 3 seconds) intended for calibrating a non-responsive touchscreen will be made ineffective once the fan cable has been disconnected.
- If the “alternate method” for calibrating a non-responsive touchscreen is needed, the reversal of the 2 Step Fan Disconnection Process below will be required.
- The fan will not function once disconnected.

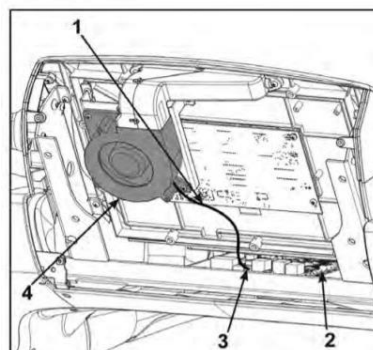

### 2 Step Fan Disconnection Process

1. Remove the back cover by removing the four **Screws (3)** securing **Back Cover (2)** to **Console Assembly (1)** using a #2 Phillips Screwdriver.

Item	Description	Qty.
1	Console Assembly	1
2	Back Cover	1
3	Screws	4

2. Unplug the **Fan Cable (1)** and unlatch the **J19 Connector (3)** from the **MCC board(2)**

Item	Description	Qty.
1	Fan Cable	1
2	MCC Board	1
3	J19	1
4	Fan	1
