

# DIGITAL COACH

Want to get more out of the equipment and space you've invested in? Digital Coach provides visual guidance, that can be used with or without a trainer, for more than 1,500 exercises.

Customize the interface and library to fit your training programs or provide added variety. It can be easily enabled on a large screen by using an iPad®.

## IT'S MORE THAN A WORKOUT

---

It's an experience in modern day fitness technology. We created a library large enough to create countless training programs. You can filter by exercise or equipment category to quickly and easily curate the types of training your exercisers are asking for.

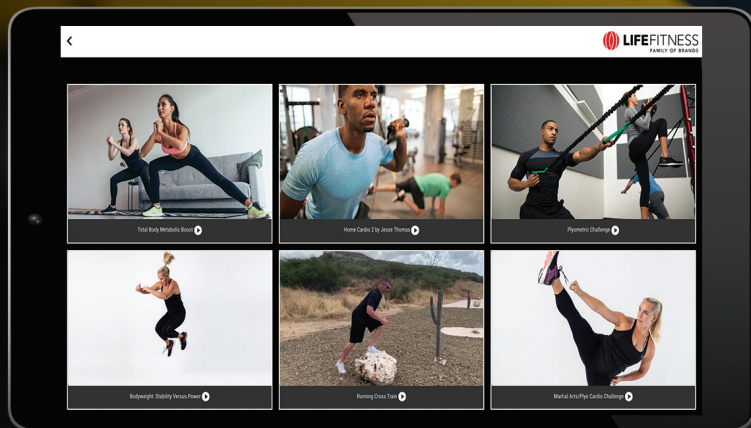

# BE DIFFERENT

Each facility is different, as are your exercisers, their tastes, needs, and abilities. Customize Digital Coach to fit the way you want your facility to operate.

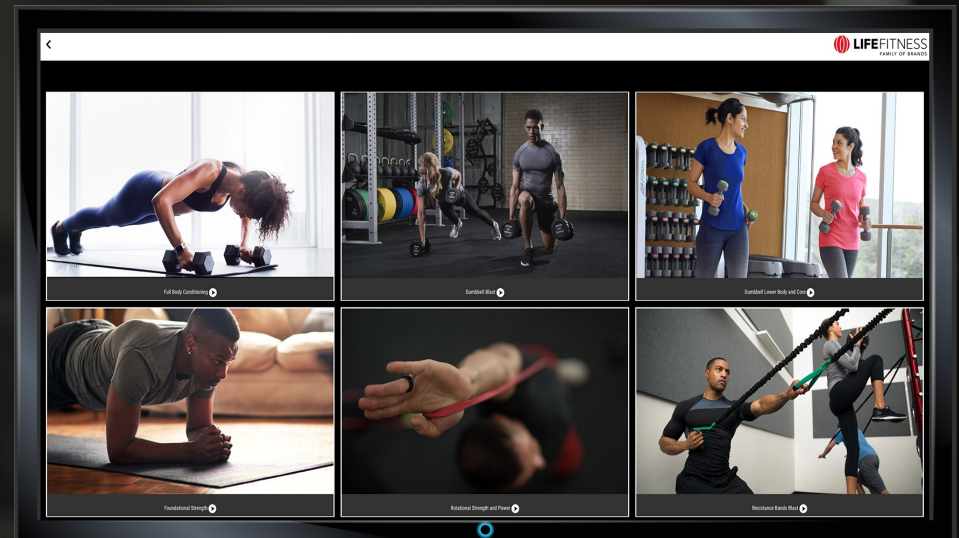

- Configure your interface to align with your brand logo and aesthetic.
- Integrate timer controls to sync with your programming.
- Tap into your in-house talent and upload your own content.

# TAILORED TO YOUR FITNESS NEEDS

Digital Coach helps you focus on your members' training needs. From "workout of the day" to classes customized from the large library of exercises and scheduled to accommodate all fitness levels. You can create classes from four different pre-loaded formats.

## UNLOCK YOUR POTENTIAL

Use Digital Coach to create energizing experiences. Whether it's workout of the day or an entire training session, with or without a trainer, at the gym or at home—any space can be turned into a club experience.

A man with short dark hair, wearing a grey tank top and a white smartwatch, is sitting on the floor of a gym. He is holding a dark blue medicine ball with both hands, looking down at it with a focused expression. The background is blurred, showing gym equipment and greenery outside.

## SUBSCRIBE TO A BETTER WORKOUT

---

Creating your unique exerciser experience is easy with a Digital Coach yearly subscription. All you need is a screen iPad and Digital Coach, and you can enable multiple screens across the facility for no additional subscription fee.
