Volume 10

October 2011

625A and 625AT Arc Trainer

The introduction of the 625A and 625AT represent the next step in completing the 625 and 770 product families.

The 625 Arc Trainers bring forward the uncompromising biomechanics of the 750 Arc Trainers including the same motion, range of motion, and resistance range. Improvements include refinement to water bottle holder and utility storage that make reach much easier for the user. The water bottle holder is now centrally located in front of the user.

The 625A features handlebars that are more streamlined and the upper body arms of the 625AT feature a grip like that of the 425A.

The display of the 625T has been adapted to use on the Arc Trainer for a uniform family presentation. This includes the ability to be equipped with the optional MYE embedded wireless. **Please note that a Personal Entertainment Monitor is NOT part of this initial release.**

The table on the following page gives a direct comparison to the 750A and 750AT Arc Trainers. Areas of differentiation appear in blue and orange.

The 625A and 625 AT are now available for quoting and order entry. The first shipments will begin November 28th.

List Price: 625A - \$7495
 625AT - \$7695
