625T with PEM

MSRP: \$8395

The 625T with PEM is now available in the quote system. At this time, we plan to begin production in mid-June.

There are a number of important differences between the 625T and 770T when equipped with PEM beyond the differences in the treadmills themselves:

- While the 770T is Made for iPod and Works with iPhone, the 625T does **not** have iPod or iPhone capabilities.
- The 770T can change channels using the Up and Down arrows on the center display or by direct channel access via the touch screen. The 625T can only change channels by using the Up and Down arrows on the console center.

Please also note that as we begin production of the 625T with PEM there will be some discrete differences between the PEM and Embedded Wireless Receiver models, and those without an AV capability. The early AV units, PEM and Embedded Wireless will have advanced capability for the control of the entertainment as well as handling the audio. Standard (Non-PEM and Non-wireless) will not have these capabilities and therefore do not lend themselves to entertainment upgrades.

Big Iron 6' x 8' Standalone Platform

Product Number: 19180

MSRP: \$2095

A standalone version of our Big Iron platforms is now available. This platform employs the same construction as our other platforms but is intended for use on its own away from racks.

770T-CT PEM Upgrade Kit

Kit Number: AX-23213

MSRP: \$300

This kit is now available to upgrade standard units for use with the PEM. The kit includes all the necessary components except for the PEM itself which must be ordered separately.
